

Automated Tracking Solutions for Oil and Gas Field Services

The highly competitive oil and gas industry is moving into the digital age. Remote monitoring of oil and gas extraction and transportation activities through a vehicle tracking system is now essential for businesses. Not only does it help to increase efficiency and worker safety, but it also helps businesses meet their production goals and minimize delays that decrease revenue.

Manage and Watch Driver Activities

- Arrivals and Departures
- Deceleration and acceleration
- Location (even on private roads)
- Engine idle times
- Routes
- Speed
- Turns
- 24-hour tracking

Get real-time alerts and notifications

Monitor Your Equipment Remotely

- Equipment performance
- Temperatures
- Tank levels
- Flow rates

Get alerts based on thresholds you choose

Get Reports that Help You Manage Your Business

- Add your own maps for better off-road tracking
- Track mileage on both highways and private roads for better fuel tax data
- Identify need for preventative maintenance to reduce breakdowns and performance degradation
- Improve your project management with reports that detail actual equipment usage
- Get turn-by-turn data on each vehicle by any time period

Go With a Proven Leader

- Get ongoing access to upgrades that contain new features and updates to ensure compatibility with the newest computer hardware and communication systems
- Get support from an established innovator in tracking systems, backed by over 25 years and the tracking of over \$1.5 billion in vehicles and assets
