

RasTrac[®] Mobile

Track your vehicles and assets **wherever you are** with your mobile device!

Locations: Real-time positions of vehicles and assets on Google Maps

Tracks: View travel history of your vehicles and assets for any time period you wish

Nearby: Find the closest vehicles/assets, locations, and addresses to any tracked asset with the touch of a button

Outputs: Manage various outputs on your devices to enable or disable functions such as starter disable and door open or close

Maintenance: Add completed maintenance intervals such as oil changes and tire rotations

Full Site: Access the full Rastrac tracking platform optimized for your mobile device

Rastrac Mobile is an extremely effective and convenient application for any fleet managers who are not always at their computer. All of your vehicles and assets, regardless if they number in the tens or thousands, are accessible right at your fingertips. Instantly view fleet data and update information from anywhere! With a very responsive design, you can also access the full Rastrac software platform which automatically scales and adjusts to your mobile device's screen.
